

## NG-609 Conventional Repeater Panel

NG-609 is a conventional repeater panel, it's compatible with NG-600 series conventional fire alarm control panels. Display and control functions are replicated and shown in the same manner as on the NG-600 series. Access to Level 2 is via a four digit code (same code as used on NG-600 series FACPs).

NG-609 designed in accordance with european standards and it's fully is compliant with EN54/2.

Repeaters main power require only a two core cable from the main control panel.

### Specifications

Supply Voltage	28 VDC ( from NG-600 series FACPs auxiliary output)
Supply Current	40 mA
Repeater Network	RS 232, RS485, FO or TCP/IP
Operating Temperature	0°C ~ +50°C
Humidity	0 ~ 95%
Dimensions	W:272mm,H:404mm,D:107mm
Approximated Weight	1.4 Kg
